**Geoff Bristow, Regional Energy Program Manager
PA Department of Environmental Protection**

Geoff Bristow serves as Regional Energy Program Manager for the PA Department of Environmental Protection's Energy Programs Office. Based out of DEP's Meadville Office, Geoff has over 20 years of experience managing the development and implementation of energy programs in northwestern PA that provide technical assistance, education, and financial assistance on energy efficiency and alternative energy within various sectors, including industry, commercial, municipal, and transportation.

Geoff also chairs the Energy Roundtable, a series of periodic meetings in western PA that explore cost-saving energy management and energy efficiency opportunities for large energy consumers.

**Angelica Ciranni, Pittsburgh 2030 District Sr. Director
Green Building Alliance**

Angelica directs GBA's Pittsburgh 2030 District, including the convening of District Partners, serving as the initiative's primary spokesperson, and acting as the liaison between GBA and 2030 stakeholders locally and nationally. Angelica is responsible for developing relationships with and supporting new and existing property, community, and resource partners to help meet the District's energy, water, transportation, and indoor air quality goals. She also designs tools, educational opportunities, and communication strategies for them. Angelica regularly speaks at public events and community meetings, as well as for national groups, including Architecture 2030 and other 2030 Districts.

Angelica was previously Assistant Vice President and Sustainability Analyst at PNC Financial Services, where her main emphasis was PNC's green building program. Prior to that position, Angelica was the Sustainability Coordinator at the Sports & Exhibition Authority of Pittsburgh and Allegheny County. Angelica holds a Bachelor of Science in Civil and Environmental Engineering from the University of Pittsburgh, with a concentration in Construction Management and Sustainability.

Mario Leone, Borough Manager/Business Owner Monaca Borough

Mario N. Leone Jr. is Manager for the Borough of Monaca where he has been employed since August 2007. Mario is an award-winning manager for efforts in promoting sustainability. He was awarded the 2014-2015 Top Performer for Small Municipalities by Sustainable Pittsburgh, the 2013 American Public Works Association (APWA) Individual

Sustainability Award, and the Pittsburgh Business Times Energy Leadership Award for the Government Sector. He is both nationally and internationally recognized for his planning efforts as the project manager for 2012 EPA Area-Wide Brownfield Planning Grant. Mario was recently filmed for a "Sustainability Pioneers" documentary, *It takes a Leader!*, and has been featured in various magazine articles for his innovations in sustainability.

Mario is the Treasurer for both the Beaver County Regional COG & Earned Income Tax Committee, Executive Board member for the Downtown Partnership Committee, Co-founder & pioneer of the Ohio River Trail Council, and serves on various other community organizations. Mario is also co-owner of Bruster's Ice Cream in Hopewell, in which he applies his passion for sustainability winning 1st place in the Franchisees "Extreme Make Over Contest" and being featured in the December 2013 Entrepreneur Magazine.

Chris Steffy P.E., Engineer/Principal Industrial Energy Engineering

Chris Steffy, P.E. is a Process Energy Engineer for Buildings, Wastewater Treatment and Renewable Energy. He is a professional engineer licensed in both Ohio and Pennsylvania and is an Energy Qualified Specialist for Process Heating Systems by the United States Department of Energy.

He has extensive professional engineering experience including: 10 years process engineering, energy assessment and reduction; 12 year of process engineering, wastewater treatment; 14 years project management, implementation water and energy systems.

As an Energy Assessor Chris evaluates and analyzes energy flow to estimate the amount of energy used in each aspect of a building, transportation pool, or wastewater treatment plant. Potential energy reduction projects are defined and estimated. As an Owner's Representative Chris provides the technical support for discussions with vendors and salesmen for equipment upgrades and energy projects. As a Project Manager assisting with the specifics of energy project implementation including budgeting, scheduling and contractor management.
