Sustainable Solutions from Sustainable Pittsburgh

425 Sixth Avenue, Suite 1335
Pittsburgh, PA 15219

A niche consultancy utilizing sustainability as the path to Improved Performance and Cost Savings for Commercial, Non-Profit, and Municipal Applications

Sound interested?

Sound like a cost? It’s not.

Sound difficult? It’s not.

Sound expensive? It’s not.
Sustainable Solutions is a niche consultancy of the non-profit, Sustainable Pittsburgh.

Sustainable Pittsburgh brings together a tailor-made multi-disciplinary team of experts to conduct a comprehensive Sustainability Assessment – an integrated examination of a client’s needs such as: energy usage, waste management, storm water management, transportation options, management practices, policies, strategic assets, and other areas. These Assessments use a whole systems approach and are intended to build capacity and provide specific quantified recommendations to save money in operations, conserve resources, enhance civic stewardship, and foster a culture of sustainability practice.

Realizing Sustainability as a Business Strategy in the Commercial Market…
The professionals on the Sustainable Solutions team appreciate proper budgeting and the need for a commercial business to generate profits. Ideas and implementation plans generated for businesses reflect that understanding and have been proven to significantly improve clients’ financial performance, while making important advances in sustainable behaviors and practices.

“All the small things they recommended added up to produce big results for us.”
- Beth Edwards, General Manager, Mall at Robinson

Building a Better Community through Sustainability within Municipalities…
When working with a municipality, the Sustainable Solutions team brings a tradition of critical consensus-building among office-holders, township staff, business owners, and residents. By investing the time to carefully listen to and respect the varying viewpoints surrounding sustainability issues, Sustainable Pittsburgh has been able to earn acceptance of the team’s recommendations, ensure official adoption, and achieve practical day-to-day implementations that produce cost savings and conserve resources while integrating sustainability into municipal management systems.

“Their big-picture thinking, combined with nuts-and-bolts tactics, ability to secure funding, and accessible staff and consultants have been tremendously valuable.”
- John Trant, Chief Strategic Planning Officer, Cranberry Township, PA

Doing Good by Doing Right in the Non-Profit Sector…
Sustainability in the non-profit sector means more than just environmental awareness. It must become a part of the organization’s very culture – and the Sustainable Solutions team recognizes that fact. They eagerly invest the time and face-to-face consulting necessary to recommend improvements that fit within the sometimes limited capabilities and budgets of non-profits, while making the highest impact.

“There is no way we could have reached this level of achievement and notoriety without the Sustainable Solutions team of experts.”
- Rich Perallo, VP of Facilities and Construction, YMCA of Greater Pittsburgh
